

Notes:

1. Use the entire 5 position switch for the BPNCNS wiring
2. The two TONE potentiometers are connected in series for deeper tone operation
3. If TONE2 is set to MIN - TONE1 acts as a normal tone for all 5 positions
4. If TONE2 is set to MAX - TONE1 acts as a treble boost for all 5 positions
5. At position 3 (only Middle pickup) - NO noise canceling

BPNCNS for guitars having RWRP Middle pickup and two TONE
